

Data Center Infrastructure

BUILT FOR HYPERSCALING, SPEED & DENSITY

THE PROBLEM

AI workloads, high-density racks, and liquid cooling are changing everything. Most suppliers are stuck in the past.

- Slow lead times
- Limited scalability
- No understanding of liquid cooling or hyperscale rollout demands

THE ARTITALIA ADVANTAGE

Artitalia brings 40+ years of manufacturing experience combine industrial-scale global manufacturing + data center expertise to deliver faster, smarter, and more cost-efficient infrastructure.

- Hybrid production (North America + Asia) = faster & lower cost
- Built for multi-site rollouts = consistent at scale
- Engineered for high-density + liquid cooling
- Full integration > engineering > fabrication > assembly > logistics

40+
years of custom
manufacturing

1.5M+
sq. ft. of
manufacturing
space

4
key locations
in North America
and Asia

500+
employees
worldwide

WHAT WE DELIVER

- Hot & Cold Aisle Containment (HAC) systems
- Server racks, frames & structural platforms
- Liquid cooling infrastructure supports (manifolds, piping frames, CDU supports, brackets)
- Power distribution enclosures (PDU / electrical housings)
- Battery & energy storage enclosures
- Cooling system structures & components
- Security cages & partition systems

**PURPOSE-BUILT FOR AI, HYPERSCALE,
& HIGH-DENSITY ENVIRONMENTS**

BUILT FOR WHAT'S NEXT

Hyperscale deployments
AI / GPU clusters
Liquid-cooled data centers
Rapid multi-region expansion

BOTTOM LINE

If your infrastructure can't scale with your data center — it becomes your bottleneck. Artitalia ensures it never does.
