.....

Artitalia Group employs more than 500 skilled professionals across North America and Asia. Our headquarters serve as the core of our operations, supported by strategic facilities providing warehousing, assembly, and logistics services. Internationally, our overseas office manages global sourcing and import programs, ensuring seamless coordination and consistent quality across every project. Together, these locations form a fully integrated network designed to efficiently support our clients' needs worldwide.

ENGINEERING

DESIGN

DESIGN:

At Artitalia we believe that design is an art form, and all great products start with great ideas. Our team of designers are innovative and creative professionals that specialize in concept and design. Artitalia's designers are always on top of the latest trends and styles around the globe. We work with our clients to understand their needs and provide them with functional and attractive solutions. To support easy decision making, our clients can visualize the outcome of our design through our 3D animations and renderings.

ENGINEERING + VALUE ENGINEERING:

Our engineering team is constantly on the lookout for new, efficient and cost-effective manufacturing solutions and processes. Our team can create, develop and translate designs into complete production drawings and can handle any type of project, simple to complex. Our engineers are key in testing and ensuring the quality and longevity of all our prototypes and designs, giving our clients peace of mind.

ACCOUNT MANAGEMENT:

Artitalia uses a proprietary ERP system called ArtVisual™ which allows us to follow projects using a barcode system from the creation of the order, to production, all the way to inventory management. We can provide our clients project reports and real-time data on every step of the project, ensuring we deliver on time and on budget. We also offer our clients the ability to directly track their project through a secure online portal called ArtWebTracker™. To ensure successful completion of every simple or complex project, Artitalia assigns a project management team to every client. This project management team consists of account executives, project managers, estimation representatives, customer service representatives, designers and engineers. The project management team combined with our ERP system guarantees each project's success.

ALWAYS WEAR EYE PROTECTION
LASER SAFETY GOGGLES

INDUSTRY 4.0 ENABLED WORKFLOWS

MATERIALS

We have the expertise and technology to work with any type and form of metal material:

- > Cold-Rolled Steel (CRS)
- > Hot-Rolled Steel (HRS)
- > Pickled & Oiled Steel (P&O)
- > Stainless Steel
- > Aluminum

Our capabilities extend across every form ensuring flexibility and innovation in design and production.

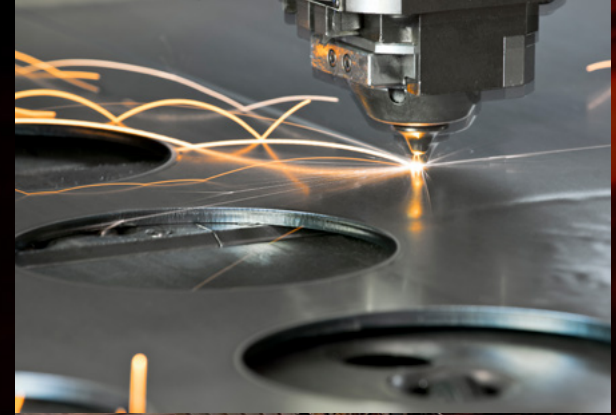

- > Sheet Metal
- > Tubing
- > Wire, Rod, Flat Bar, Extrusions, etc.

CUSTOM METAL MANUFACTURING

Driven by automation and industry 4.0, we are equipped with a gamut of specialized machinery to tackle any metal project.

- > Laser Cutting and Automated Punching of Sheet Metal
- > Automated Metal Bending
- > Automated, Self-Loading Laser Cutting Machine for Tubes and Profiles
- > Robotic Laser Welding
- > Automated Powder Coating System
